

CONIPUR *KF*

Mixed-elastic sports floor for sports halls

CONIPUR *KF*

CONIPUR *KF* is a **mixed-elastic** sports floor, in which the point-elastic coating is provided with a area-reinforcing hard matrix. If there is a punctiform load on its surface, a somewhat larger deformation depression forms than with a point-elastic floor.

This improves its characteristics with regard to stability and sliding behavior, ball reflection and navigability with sport equipment. It distinguishes itself with high force reduction.

System variations

CONIPUR *KF eco*
The functional option.

The combination of high functionality and optimal price-performance ratio makes CONIPUR *KF eco* the perfect sports floor for almost all areas of application.

CONIPUR *KF pure*
The pure option.

With its low-emission properties, CONIPUR *KF pure* reduces the load of ambient air and promotes the protection of health.

CONIPUR *KF protect+*
The safe option.

In addition to its low-emission properties, CONIPUR *KF protect+* offers optimum flame retardancy and guarantees the highest safety and the protection of health.

Technical Parameters

M4

CONIPUR *KF*
10+2+2 mm

- Rolling load: 1,500 N
- Ball rebound: 97%
- Sliding behavior: 96
- Shock absorption: 53 %
- Standard deformation: 3.0 mm
- Wear: 32 mg
- Impact resistance: 15 Nm
- Residual impression: 0.12 mm
- Fire class: E_{fl}
- PCP: E1
- Formaldehyde: E1

Protective function

In terms of sports function, the mixed-elastic surface type resembles the point-elastic system. Regarding its protective function, this means that impact forces are absorbed quickly in case of falls. With its area-reinforcing PUR hard matrix, this surface type also provides high stability to athletes, which minimizes the risk of injury.

Suitability

- **Target groups:**
Adults, children and adolescents
- **Sports:**
Ball games, particularly handball, volleyball, basketball, soccer, badminton, gymnastics. Multipurpose use possible.

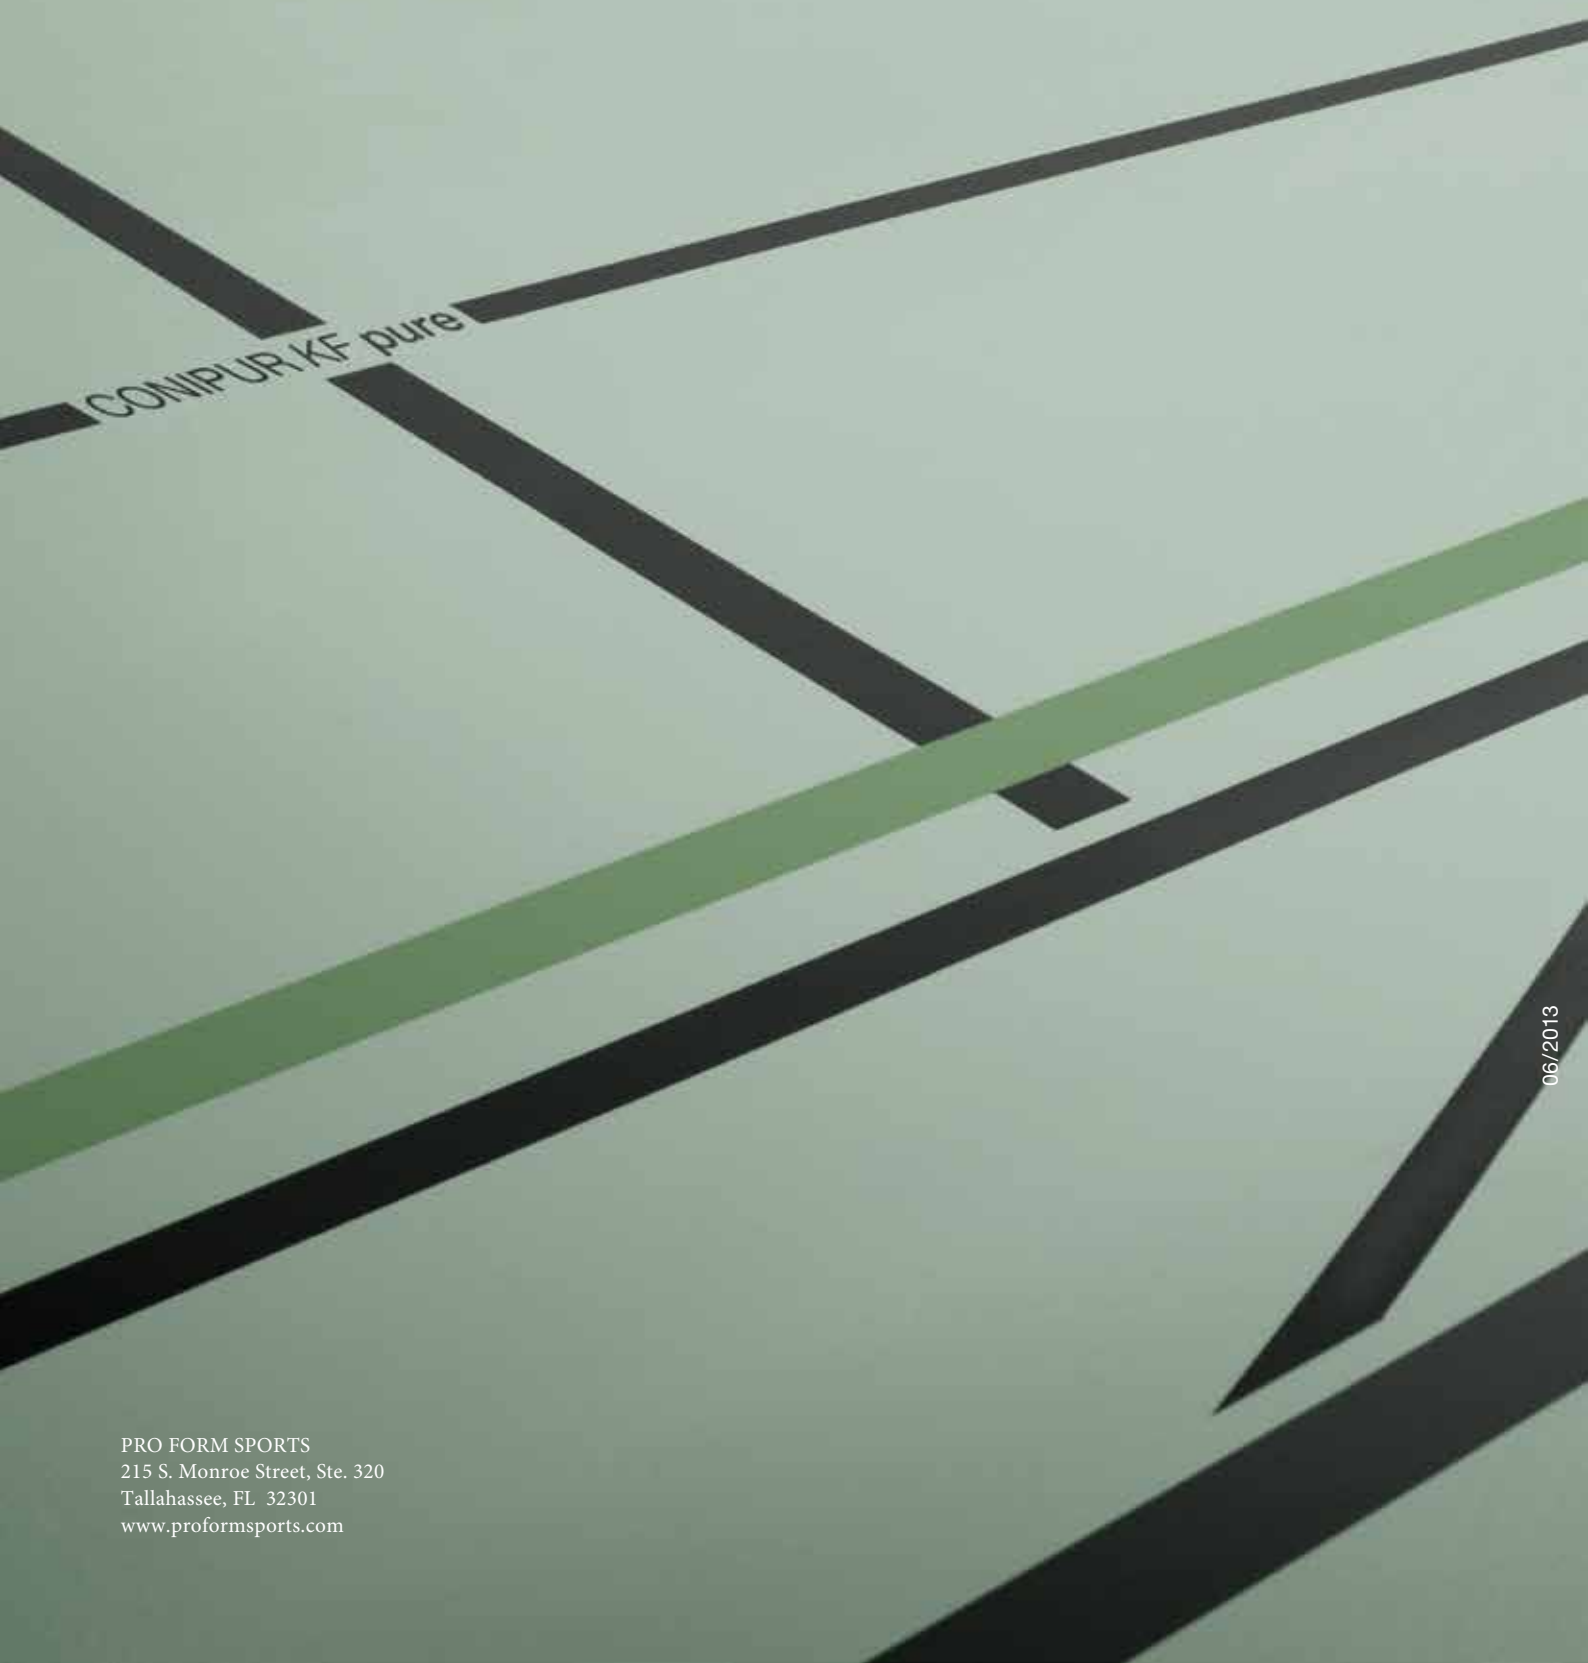

- Tested according to **EN 14904** and **DIN 18032-2**.
- Classified according to **EN 13501-1** (fire classification).
- Emission testing according to **AgBB**.
- Certified by major **international sports associations**.

Polyurethane – the high-performance plastic!

Polyurethane is the essential element for all sports floor systems of CONICA. Compared to other surface materials, this flexible plastic combines numerous advantages:

- All color variations are possible
- Smooth surface
- Low maintenance
- Positive ecological balance sheet
- Easy to be „retopped“ in case of renovation
- Adjustable mechanical properties (hardness, elasticity, stretch)
